1. Application Overview & Roles

What is this application?

The Real Estate CMS is an internal platform for managing investors, documents, and communications within the fund. It covers the full investor lifecycle — from first contact through to post-investment monitoring — as well as secure document sharing with external parties.

Roles and permissions

Role	Description
superadmin	Full access to everything. The only role that can delete investors and manage all system settings.
admin	Nearly identical to superadmin. Can approve emails, manage document packages, capital calls, and distributions.
relationship_manager	Sees and manages only their assigned investors. Can create email drafts, upload documents, and create access links.
operations	Manages capital calls and distributions. Access to public and restricted documents.
compliance_officer	Access to public, restricted, and confidential documents. Can approve investors and stage changes.
fund_manager	Manages capital calls/distributions, access to all document levels.
auditor	Read-only. Access to all documents. No modifications allowed.
data_room_administrator	Manages the Data Room (upload, approve, archive documents). Access up to confidential level.

2. Login & Security (2FA)

Logging in

1. Go to: `https://[app-domain]/login`
2. Enter your **email** and **password**.
3. Click **Log In**.

Two-Factor Authentication (2FA)

Required for: superadmin, admin, operations, compliance, data_room_administrator, auditor. **First-time 2FA setup:**

1. After first login, the system automatically redirects you to `/2fa/setup`.
2. Open an authenticator app on your phone (e.g. **Google Authenticator** or **Authy**).
3. Scan the QR code shown on screen.
4. Enter the 6-digit code generated by your app.
5. Click **Enable 2FA**.

Every subsequent login:

1. Enter email and password.
2. The system requests a 6-digit code — open your authenticator app and enter the current code.
3. Click **Verify**.

Note: The `relationship_manager` role does **not require** 2FA, but it is strongly recommended to set it up.

3. SUPERADMIN / ADMIN — Complete Guide

3.1 Dashboard

URL: `/dashboard`

The dashboard shows:

- Total number of investors, active investors, prospects
- List of the most recent 5 investors (with links to their detail pages)
- Quick links to all major sections

3.2 Investor Management

Viewing all investors

URL: `/investors`

The table shows: name, type, stage, status, assigned manager, fund.

Click an investor's name to open their detail page.

Creating a new investor

URL: `/investors/create` **Step by step:**

1. Click the **New Investor** button (top right on `/investors`).
2. Fill in the required fields:

Field	Description
Investor Type	individual / corporate / family_office / spv / fund
Organization Name	Organisation name or full name of the individual
Legal Entity Name	Legal name (can be the same as Organization Name)
Jurisdiction	Country/jurisdiction of the investor
Assigned To	Select the Relationship Manager responsible for this investor
Fund	The fund the investor is investing in (if applicable)

3. Optionally fill in:

- **Source of Introduction** — how you became aware of this investor
- **Placement Agent Name/Email** — if an intermediary is involved
- **Target Commitment Amount** — target investment amount and currency
- **Notes** — internal notes

4. Click **Create Investor**.

The system automatically: Creates the investor at stage `prospect`, status `pending`, and generates their own folders in the `Data Room`.

Investor detail page (`/investors/{id}`)

The page is divided into sections:

- **Basic Info** — core investor data
- **Eligibility** — eligibility for investment status
- **KYC** — Know Your Customer status
- **Funding** — financial data about the investment
- **Compliance** — checkboxes for compliance gates
- **Contacts** — list of contacts
- **Meetings** — logged meetings
- **Document Access Links** — links for document access
- **Email Drafts** — associated draft emails

- **Activity Log** — history of all actions

Editing an investor

1. Open the investor → click the **Edit** button.
2. Change the desired fields.
3. **Compliance checkboxes:** When you check a checkbox for the first time (e.g. `Board Approval`), the system automatically records the date and time.
4. Click **Update Investor**.

3.3 Stage Changes & Gate Checks

URL: `/investors/{id}/change-stage`

Investor stages (in order)

```

prospect
  → eligibility_confirmed
    → portal_access_granted
      → kyc_in_progress
        → kyc_completed
          → funded
            → monitored

```

How to change the stage:

1. On the investor detail page, click **Change Stage**.
2. The system shows a list of available stages and a **requirements checklist** for each.
3. Select the target stage.
4. The system shows what is **met** (✓) and what is **missing** (X).
5. If all requirements are met, the **Confirm Stage Change** button becomes available.
6. Click **Confirm** — the change is recorded in the Activity Log.

What is checked for each stage change:

Stage	Requirements
eligibility_confirmed	At least one contact exists; investor_type filled in
portal_access_granted	Primary contact has an email; confirmed_professional_client ✓
kyc_in_progress	A commitment amount exists
kyc_completed	kyc_status = completed or approved; fatca_compliant ✓
funded	subscription_signed_date filled; board_approval_date filled; units_allotted > 0
monitored	funded_amount > 0; welcome_letter_sent_date filled

Important: If a requirement is not met, the system **blocks** the stage change and shows what needs to be filled in. Go back to Edit and complete the missing data.

Viewing stage history

On the investor page, click **Activity Log** (`/investors/{id}/activity`):

- See who changed the stage and when
- All actions are logged (document downloads, compliance gate submissions, stage transitions)

3.4 Data Room — Uploading & Organizing Documents

URL: `/data-room`

Data Room structure overview

The Data Room is organized into **sections (folders)**:

- **Sections 1–11:** Shared folders (all investors see `public` documents)
- **Section 12:** Automatically created per investor (private folder)
- Below sections 1–11, **Investor Folders** are shown — specific folders per investor

Each folder displays: number, name, access level badge, document count.

Click a folder to expand it and see its documents.

Document access levels

Badge	Colour	Who can see it
Public	green	Everyone, including investors
Restricted	yellow	Staff only (RM, operations, admin...)
Confidential	orange	Compliance, data_room_admin, admin, superadmin
Highly Confidential	red	Admin and superadmin only

Uploading one or more documents

1. Click the **Upload Document** button (top right of the Data Room page).
2. An upload modal will appear.

Selecting a folder:

- Use the dropdown to select the **folder** you are uploading into (e.g. "01 — Fund Overview").
- If it is an investor folder, information about that investor will be displayed.

Drag & Drop or Browse:

- Drag files into the drag & drop zone, **or**
- Click the zone → open File Explorer → select **one or more files** (Ctrl+click for multiple selection).

Settings (applied to all files in the batch):

Field	What to enter
Version	Document version number (default: 1.0)
Description	Brief description of the content
Access Level	Select: Public / Restricted / Confidential / Highly Confidential

The default access level is `Public` . Change to `Restricted` only for documents that must not be visible to investors.

Starting the upload:

1. Click the **Upload** button.
2. The system uploads files **one by one** — a progress bar shows progress for each.
3. A ✓ appears in the queue list as each file completes.
4. The modal closes automatically after all files have been uploaded successfully.

Limit: Maximum file size is **500 MB** per file.

Supported formats: PDF, DOCX, DOC, XLSX, XLS, PPTX, PPT, and others.

Document workflow (Status)

Every document has a status badge shown next to the access level badge:

Status	Meaning
Approved	Visible and available for download
Draft	Awaiting submission — not yet in review
Under Review	Submitted for review, awaiting approval
Archived	Hidden, not available for download

Approval flow:

1. Upload → document is automatically set to **Approved**
2. If review is needed: click **Submit** → status becomes **Under Review**
3. Admin/Superadmin sees buttons: **Approve** | **Reject** | **Archive** | **Delete**

Exporting the document index

Click **Export Index** (top right) → downloads an Excel file with all documents and their metadata.

3.5 Document Packages & Access Links

What is a Document Package?

A package is a **collection of documents** from the Data Room that are sent together. Each package can have **multiple access links** for different recipients.

Creating a Document Package

URL: `/document-packages/create`

1. Go to **Document Packages** in the navigation.
2. Click **Create Package**.
3. Enter:
 - **Name** — package name (e.g. "PPM Package Q2 2026")
 - **Description** — optional
 - **Notify User** — select a staff user who receives a notification when someone requests access
4. **Select documents:** Click the documents from the Data Room list that you want to include.
5. Click **Create Package**.

Creating an Access Link for an investor

Scenario: You need to send documents to an external lawyer or potential investor without them having an account. **Step by step:**

1. Open the investor's page (`/investors/{id}`).
2. Scroll to the **Document Access Links** section.
3. Click **Create Access Link**.
4. On the form (`/document-access-links/investor/{id}/create`):
 - **Label** — a description of the purpose (e.g. "For ABC Law Firm - Due Diligence")
 - **Package** — select an existing package **OR** select individual documents to create an ad-hoc package
5. Click **Generate Link**.
6. The system generates a **unique token URL** such as: `https://[domain]/doc-access/AbCdEfGh...`
7. Click **Copy** to copy the link and send it to the recipient by email.

What happens when the recipient clicks the link

1. Recipient opens the link → sees a form with the package name and fields for name and email.
2. They enter their details and confirm consent (privacy notice).
3. They receive the message: "Request received — awaiting approval."
4. **Staff receives a notification** about the new request.

5. Admin/RM approves the request → recipient receives an email with a download link.
6. Recipient has **48 hours** to download the documents.

Managing Access Links

At `/document-access-links/investor/{id}` :

- View all links for the investor
- Number of pending requests per link
- Delete a link (revoke access)

Approving access requests

URL: `/document-access-requests`

1. Go to **Access Requests** in the navigation.
2. The table shows: name, email, request date, which link, status.
3. Click **Approve** — the recipient receives an email with a download link (48h window).
4. Click **Reject** — the recipient receives a rejection email.

3.6 Composing & Sending Emails

Important: There is no "direct send" button in this application. All emails go through the **Email Drafts** workflow: compose → save → approve → send. This applies to both Admin and Relationship Manager roles.

Composing an email (Compose Email)

Access: From any investor's detail page → **Compose Email** button, or via **Email Drafts** → **Create Draft** in the navigation. **Step by step:**

1. Open an investor's detail page and click **Compose Email**.
2. Fill in the form:
 - **On Behalf Of** — select the person whose name appears as sender (optional)
 - **Subject** — email subject line
 - **Load Body Template** — optionally load a pre-written template as a starting point
 - **Email Body** — write or edit the content (rich text editor)
 - **Signature** — select a signature block (optional)
 - **CC** — optional CC email; if the investor has a placement agent, a checkbox appears to CC them automatically
 - **Attach Documents** — select documents from the Data Room to attach
3. Choose an action:
 - **Save as Draft** — saves the email, does not submit for approval yet
 -  **Save & Preview** — saves as draft and immediately opens a preview of how the email will look to the investor
 - **Submit for Approval** — saves and sends to admin for review

Bulk email (multiple investors at once)

URL: `/investors/send-email/bulk` — accessible via **Investors** → **Bulk Send Email**

Bulk emails follow the **same approval workflow** as single emails — they do not send immediately.

Step by step:

1. Use the filters to select recipients:
 - **Send To** — All Investors or By Stage
 - **Stage** — appears when "By Stage" is selected
 - **Only my assigned investors** — checkbox to limit to your assigned investors
2. The recipient list updates automatically, showing names, emails, and stages.
3. Select a template and optionally add document attachments.

4. Click **Submit for Approval** — the bulk draft is saved with a snapshot of the current recipient list and submitted to admin for review.
5. Admin sees the bulk draft in the  **Pending Bulk Emails** section on the Email Drafts page, with the recipient count, stage filter, and creator name.
6. Admin clicks **Approve**.
7. Back on the Email Drafts page, the creator sees the bulk draft in **My Bulk Email Drafts** with status **Approved** and a **Send to All** button.
8. Click **Send to All** — the system sends the email individually to each investor in the snapshot, archives each in their Communication Log (Section 12), and logs each send.

Note: The recipient list is fixed at the moment of submission. If investors are added or removed after submission, the sent list reflects the original snapshot.

3.7 Email Drafts — Approval Workflow

How the workflow works

RM composes email → Submits for Approval → Admin reviews → Approves → RM sends

Only the **creator** of a draft can send it once approved. Admin approves, but does not send.

Viewing pending drafts

URL: `/email-drafts`

Admin/Superadmin sees a dedicated **Pending Approval** section at the top of the page.

Approving a draft

1. Click **Review & Edit** on a draft in the Pending Approval table.
2. Review the content; click **Preview** to see how the email will render for the investor.
3. If correct: click **Approve**.
4. The creator receives access to the **Send** button — only they can trigger sending.

Rejecting / returning a draft

1. On the preview page, click **Reject** (or edit the draft and change the content).
2. The draft reverts to **draft** status — the creator must resubmit it.

3.8 Capital Calls

URL: `/capital-calls`

Creating a new Capital Call

1. Click **Create Capital Call**.
2. Fill in:
 - **Title** — name of the call (e.g. "Q2 2026 Capital Call")
 - **Description** — description
 - **Total Amount** — total amount to be called
 - **Call Date** — date of issuance
 - **Due Date** — payment deadline
3. **Add investors:**
 - Select investors from the list
 - Enter the **amount** required from each investor
4. Click **Create** → the Capital Call is in **Draft** status.

Issuing a Capital Call

1. Open the Capital Call (`/capital-calls/{id}`).
2. Click the **Issue** button.
3. Status changes from `Draft` → `Issued` .
4. (Future version: investor notification emails are sent automatically.)

Tracking payments

On the Capital Call detail page:

- Table of investors with payment status
- Statistics: Total Called, Total Received, Outstanding, Payment %
- For each payment: **Mark as Paid** / **Mark as Failed** buttons

3.9 Distributions

URL: `/distributions`

Creating a Distribution

1. Click **Create Distribution**.
2. Fill in:
 - **Title** — name (e.g. "Q1 2026 Dividend Distribution")
 - **Type** — dividend / return_of_capital / profit_share / other
 - **Total Amount** — total distribution amount
 - **Distribution Date** — date of distribution
 - **Record Date** — record date
3. **Add investors** with per-investor amounts.
4. Click **Create** → status is `Draft` .

Distribution workflow

`Draft` → `[Approve]` → `Approved` → `[Process]` → `Processing` → `Completed`

1. Open the Distribution → click **Approve**.
2. Click **Process** when you begin processing payments.
3. Mark individual payments as **Paid** as they are received.

3.10 Payments

On the detail page of a Capital Call or Distribution:

Marking a payment as paid

1. Find the investor in the table.
2. Click **Mark as Paid**.
3. Enter:
 - **Payment Method** — wire_transfer / ach / check / cash
 - **Reference Number** — transaction reference number
 - **Paid Date** — date (defaults to today)
4. Click **Confirm**.
5. The system automatically updates the totals and the Capital Call/Distribution status.

Bulk mark as paid

For multiple investors at once:

1. Check the checkboxes next to the investors.
2. Click **Mark Selected as Paid**.
3. Enter the method and reference number to apply to all.

Reversing a payment

If you marked a payment as paid by mistake:

1. Find the payment → click **Reverse**.
2. The payment reverts to `Pending` status.
3. Totals are automatically recalculated.

3.11 Data Room Viewers (External Accounts)

URL: `/data-room-viewers`

A Viewer is an external account (e.g. an external auditor or legal adviser) that has **direct login** access to the investor portal — but only for viewing documents.

Creating a Viewer account

1. Click **Create Viewer**.
2. Enter **name**, **email**, **password**.
3. Click **Create**.
4. The system creates an investor record of type `individual` with access level `viewer`.
5. The viewer logs in at `/investor/login` just like regular investors.

Deactivating a Viewer

1. Find the viewer in the table.
2. Click **Deactivate** — the account becomes inactive and the viewer can no longer log in.

3.12 Email Templates

Email Body Templates

URL: `/email-body-templates`

1. Click **Create Template**.
2. Enter the **name** and **body** content.
3. Activate/deactivate templates as needed.
4. When creating a draft, these templates are available in the dropdown.

Available placeholder: `{{ investor_name }}` — automatically replaced with the investor's real name.

3.13 Document Access Requests

URL: `/document-access-requests`

List of all pending requests (external users who have clicked an access link).

Each row shows:

- Name and email of the requester
- Which link (and which document package)
- Date of request
- Buttons: **Approve** (48h access) | **Reject**

3.14 Investor Portal Access

Granting portal access to an investor

1. Open the investor's page.
2. Verify that a **primary contact** with an email address exists (required!).
3. Verify the stage is at least `portal_access_granted`.
4. Click **Create Portal Access**.
5. The system:
 - Creates an InvestorUser account (email + auto-generated password)
 - Sends a login credentials email to the investor
 - Redirects to `/investor/login`

Note: The investor must pass through the **Compliance Gate** on first login (confirming professional client status, confidentiality, and PPM) before they can access documents.

What investors see in the portal

- **Dashboard:** commitment amount, funded %, capital call payments, distributions
- **Profile:** their own data (read-only)
- **Documents:** folders they have access to, only documents with access level = `Public`

3.15 Reports

URL: `/reports`

Currently available report:

- **Placement Agents Export** — Excel list of all investors with placement agent data

Click **Export** → downloads the Excel file.

4. RELATIONSHIP MANAGER — Complete Guide

Note for RMs: You can only see and manage investors **assigned to you** (`assigned_to_user_id = your ID`). This is an automatic system restriction.

4.1 My Investors Overview

URL: `/investors`

The table shows only your investors with:

- Name, type, stage, status
- Click a name to open the detail page

Use stage filters or the search bar to find a specific investor.

4.2 Creating a New Investor

URL: `/investors/create`

1. Click **New Investor**.
2. Fill in the fields (detailed description in [section 3.2](#32-investor-management)).
3. In **Assigned To** — select yourself (or an admin assigns you).
4. Click **Create Investor**.

4.3 Editing an Investor — Step by Step

URL: `/investors/{id}/edit`

The edit form has several sections. Fill them in as the onboarding progresses:

Section: Basic Info

Field	When to fill
Investor Type	At creation
Organization / Legal Entity Name	At creation
Jurisdiction	At creation
Source of Introduction	At creation
Placement Agent (name + email)	If an intermediary is involved
Notes	Anytime — internal notes

Section: Eligibility

Field	When to fill
Confirmed Professional Client	When the investor confirms their status
Agreed Confidentiality	When the confidentiality agreement is signed
Acknowledged PPM Confidential	When PPM terms are accepted

Section: KYC

Field	When to fill
KYC Status	Update as KYC progresses (pending → in_progress → completed)
KYC Risk Rating	After assessment (low / medium / high)
Enhanced Due Diligence Required	Check if required
Is PEP	Check if politically exposed person
FATCA Compliant	Check when confirmed
CRS Compliant	Check when confirmed
KYC Completed Date	Date KYC was completed

Section: Funding

Field	When to fill
Target Commitment Amount	Target investment amount
Final Commitment Amount	Final signed amount
Funded Amount	Actual amount received (updated automatically via Capital Calls)
Fund	Select the fund
Units Allotted	Number of units allocated (after subscription signing)

Section: Stage-Specific fields (appear automatically)

Field	When to fill
Subscription Signed Date	When the Subscription Agreement is signed
Board Approval Date	Date of Board approval
PPM Acknowledged Date	Date PPM was acknowledged
Welcome Letter Sent Date	Date the welcome letter was sent
Last KYC Refresh Date	Date of the last KYC refresh

4. Click **Update Investor** to save.

4.4 Investor Contacts

On the investor detail page, **Contacts** section:

Adding a new contact

1. Click **Add Contact**.
2. Fill in:
 - First Name, Last Name, Email (required)
 - Phone, Mobile (optional)
 - **Role** — e.g. "Primary Contact", "CFO", "Legal Counsel"
 - **Is Primary** — mark one contact as primary (they receive all emails)
 - **Permissions:**
 - Receives Capital Calls (yes/no)
 - Receives Distributions (yes/no)
 - Receives Reports (yes/no)
 - Can Sign Documents (yes/no)
3. Click **Add Contact**.

Removing a contact

Click **Remove** next to the contact → confirm → the contact is removed.

Important: At least one contact must be marked as **Is Primary** for emails to be sent and portal access to be created.

4.5 Meeting Notes

On the investor detail page, **Meetings** section:

1. Click **Log Meeting**.
2. Fill in:
 - **Meeting Date** — date of the meeting
 - **Attendees** — who was present (free text)
 - **Outcome / Notes** — notes on results and follow-up actions
3. Click **Save Meeting**.

All meetings are displayed chronologically and stored in the Activity Log.

4.6 Stage Changes & Checklists

URL: `/investors/{id}/change-stage` **Before attempting a stage change, check the following:**

1. Open the **Change Stage** form.

2. Click the target stage in the dropdown.
3. The system displays a **checklist** — review each item:
 - ✓ green = satisfied
 - X red = **missing — you must complete this first**
4. If there are red X items — close the form, go to Edit, and fill in the missing data.
5. Return to the Change Stage form → when all items show ✓ green → click **Confirm Stage Change**.

Common issues and solutions

Issue	Solution
"Primary contact required"	Add a contact and mark them as Is Primary
"Professional client confirmation needed"	Edit → Compliance tab → check the checkbox
"Commitment amount required"	Edit → Funding tab → enter Target Commitment Amount
"KYC must be completed"	Edit → KYC tab → change KYC Status to completed
"Subscription date required"	Edit → fill in Subscription Signed Date
"Units allotted required"	Edit → Funding tab → enter Units Allotted

4.7 Uploading Documents to the Data Room

URL: `/data-room`

RM's have upload permission. They cannot delete or archive documents (that is done by admin/superadmin).

Step-by-step upload:

1. Go to `/data-room`.
2. Click **Upload Document** (top right corner).
3. **Select a folder:**
 - For general fund documents → select the appropriate section (1–11)
 - For investor-specific documents → scroll in the dropdown to **Investor Folders** and select the investor's folder
4. **Add files:**
 - Drag files into the Drag & Drop zone, **or**
 - Click the zone → File Explorer → select one or more files
5. **Settings:**
 - Version: enter version number (e.g. `2.0`)
 - Description: brief description
 - Access Level: **Public** (default) — change only if the document must remain internal
6. Click **Upload**.
7. Wait for all files to upload (progress bar).

For investor-specific documents: Upload to Section 12 of the relevant investor (Communication Log etc.) or their private folder.

4.8 Creating Document Packages & Access Links

Scenario: A prospective investor wants to review certain fund documents. You need to send them a secure link that does not require creating an account.

Step 1: Create a Package (if one doesn't exist)

1. Go to `/document-packages/create`.

2. Enter the package name (e.g. "Initial DD Package — [Investor Name]").
3. Select the documents to include.
4. Click **Create Package**.

Step 2: Create an Access Link

1. Open the investor's page.
2. **Document Access Links** section → click **Create Access Link**.
3. Select:
 - **Label** — e.g. "Due Diligence for XYZ Advisors"
 - **Package** — select the package you just created
4. Click **Generate Link**.
5. Click **Copy Link** and save the link.

Step 3: Send the link to the recipient

Send the link (e.g. by email): `https://[domain]/doc-access/[token]`

Step 4: Monitor requests

1. The recipient clicks the link → enters name + email → waits for approval.
2. You receive a notification about the new request.
3. Go to `/document-access-requests`.
4. Click **Approve** — the recipient receives an email with a download link.

4.9 Composing & Sending Emails

Important: There is no direct "Send" button for individual emails. All emails must go through the approval workflow: compose → submit for approval → admin approves → you send.

Step by step — composing an email

1. Open the investor's detail page.
2. Click **Compose Email**.
3. Fill in the form:
 - **On Behalf Of** — whose name appears as sender (optional)
 - **Subject** — email subject line
 - **Load Body Template** — optionally load a pre-written template
 - **Email Body** — write or edit the content in the rich text editor
 - **Signature** — select a signature block
 - **CC** — optional CC; checkbox appears if investor has a placement agent
 - **Attach Documents** — select from Data Room
4. Choose:
 - **Save as Draft** — save without submitting
 -  **Save & Preview** — save and immediately see how the email looks to the investor
 - **Submit for Approval** — save and send to admin for review

After submitting for approval

- The draft appears in the admin's **Pending Approval** queue
- Admin reviews and approves (or rejects with comments)
- Once approved, you see a **Send** button on the draft — click it to send
- The email goes to the investor's **primary contact** email address
- It is automatically archived in the Data Room → Section 12 (Communication Log)

4.10 Email Draft — Tracking & Managing

URL: `/email-drafts`

- When status is `draft`, you can click **Submit for Approval** from the drafts list.
- An admin sees the draft in their **Pending Approval** list.
- Once approved, you receive a notification and can click **Send**.

Important: Only you (the creator) can send an approved draft. The admin approves, but you send it.

4.11 Tracking Investor Activity

URL: `/investors/{id}/activity`

The page shows a chronological overview of:

- All stage changes (who changed it, when, from which stage to which)
- Download activity (who downloaded which document and when)
- Compliance gate submissions (when the investor accepted terms)
- Portal login activity
- Sent emails

Use this page for compliance checks and monitoring onboarding progress.

5. Investor Portal — What Investors See

This chapter explains the investor experience, useful when guiding investors on how to use the portal.

Login URL: `https://[domain]/investor/login`

First login flow:

```
Login (email + password)
  → Compliance Gate (mandatory on first access)
    → Confirm professional client status ✓
    → Agree to confidentiality ✓
    → Acknowledge PPM confidentiality ✓
    → Submit
  → Dashboard
```

What investors see on the Dashboard:

- Commitment amount and Funded %
- Table of the 5 most recent Capital Call payments
- Table of the 5 most recent Distributions
- Total capital called, total distributed, pending capital calls

Documents:

- Folder structure (only folders the investor has access to)
- For each folder: list of documents with status `Public` and `Approved`
- Download button for each available document
- Every download is automatically logged

Profile:

- Read-only view of their own data
-

6. Public Document Access (No Login Required)

This is the mechanism for sharing documents with people who **do not have an account** in the system.

Flow for an external party:

1. **Receives a link** (e.g. from an RM by email): `https://[domain]/doc-access/[token]`
2. **Opens the link** → sees the document package name and a form
3. **Fills in:**
 - Full name
 - Email address
 - Confirms consent to the Privacy Notice
4. Receives the message: **"Your request has been received. Awaiting approval."**
5. Once approved by admin/RM, receives an **email with a download link**
6. The link is active for **48 hours** from the time of approval
7. Can download all documents in the package

Consent tracking: The system automatically records the date, IP address, and Privacy Notice version — for compliance purposes.

7. Document Access Levels — Reference Table

Who can see which document level:

Who	Public	Restricted	Confidential	Highly Confidential
Superadmin	✓	✓	✓	✓
Admin	✓	✓	✓	✓
Compliance Officer	✓	✓	✓	—
Data Room Admin	✓	✓	✓	—
Internal Director	✓	✓	✓	✓
Auditor	✓	✓	✓	✓ (read-only)
Operations	✓	✓	—	—
Relationship Manager	✓	✓	—	—
Investor (portal)	✓	—	—	—
External Viewer	✓	—	—	—

When to use each level:

Access Level	When to use
Public	General fund materials that investors may view (teaser, presentation, prospectus)
Restricted	Internal staff documents that investors must not see
Confidential	Sensitive legal and financial documents for the compliance/admin team
Highly Confidential	Strictly confidential — top management only (e.g. board materials)

8. Investor Lifecycle — Stage Map

This manual reflects the state of the application as of June 2026. For questions or corrections, contact the system administrator.
